

Impression of the  
end goal

Dear local resident,

On Saturdays, November 1st and 15th, the forest working group, part of the collective urban district south green, will plant some pollard willows along the ditch edge near the bus lanes. We could really use your help with this.

*If you are new to living here and would like to connect with your Dutch local residents, this is a great opportunity to make contacts outside your work environment.*

**What needs to happen then: a lot, such as,**

measuring where the trees will go, gathering the necessary materials to plant the tree and of course digging holes and planting trees.

**In short, there is plenty of work and not just for the very strongest.**

**If you'd like to help**, please sign up by sending an email to **collectiefstedenwijkzuidgroen@gmail.com**, **attn. Cary**, and let us know when you're available (November 1st and/or 15th). Tools, coffee, tea, water, and sandwiches will be provided.

From 9.30am, the Veldhoek (Deurnestraat 40) will be open for a first cup of coffee or tea, where we can get acquainted and explain the procedure. We start at 10.00am with a lunch around 12.30pm and an end time of ±4.00pm.

If you only can a part of the day please indicate this in your registration. You will receive a reminder by email in the last week of October.

Thank you in advance for your involvement  
and until then, greetings, Cary

**Collectief**
